Communication Skills | Professionalism | Empathy | Resilience

PROJECTS

Multi-Technology Dictionary Web App with User Authentication

Developed a Dictionary web app using JDBC, Hibernate, and Spring Framework, showcasing adaptability to diverse technologies. Implemented user-friendly registration and login features, securely storing user data in MySQL Database. The application enables users to search for word meanings, providing a seamless experience.

A Real-time Weather Web Application

Dynamic weather web application using Java, Servlets, JSP, HTML, CSS, and JavaScript, enabling users to effortlessly access real-time weather data. Implemented integration with a reliable weather API to ensure up-to-date and precise information, enhancing user engagement and satisfaction.
